

## ONLINE EVENTS

Online events are offered each term by the FSA. These are designed to support your schools innovation journey and provide opportunity to develop professional networks across the FSA schools.

Webinars, Think Tanks and Virtual School tours are a great PD opportunity for all your staff. In addition to the live zoom, these events are live-streamed on our youtube channel.

Momentum Series are hosted on zoom and are designed to support school leadership teams to build an adaptive innovative school culture. Also a great opportunity to build professional networks across the FSA!

We know how busy schools are so there is absolutely no expectation to attend all events (we think if you were able to attend even just one event each term you'd be quite amazing!). Please do feel free to invite staff to join the events as you see appropriate.

Each school in on their own innovation journey... the FSA online events are provided as that extra layer of support. We also record our events and they are available on request.
