

## VIRTUAL SCHOOL TOUR

### LIGER LEADERSHIP ACADEMY CAMBODIA

Tuesday 24th May  
4:00–5:00pm AEST

The Liger Leadership Academy is a not for profit school that recruits children from various provinces in Cambodia to change their lives and expand their opportunities and in doing so create the change agents for the future of the country. Through a six-year program of project-based, opportunity-based learning and a focus on entrepreneurship and STEAM, students are learning the skills to create change in their own communities and beyond.

At Liger Leadership Academy the learning is truly personalized and differentiated towards a student's interests, skills, and passion. Every effort is made to accommodate a student's interests. If a pupil wants to go on a week-long seminar on business start-ups or a two-day course on birds with expert ornithologists, the school arranges this. Students create a portfolio of their best work which is representative of their unique learning journey and personal growth.

At Liger, students learn about the world around them by becoming active change agents in that world. The school embodies a design thinking approach, encouraging students to think deeply, brainstorm ideas, plan and implement solutions to real problems. Liger allows for at least 25% of the time for experiential learning off campus.
