Future Schools

Virtual School Tour – Finland

hosted by special guest
Pasi Sahlberg

The educational system of Finland is considered to be one of the best in the world. A distinctive feature of Finnish education is that it is free with equal access to educational opportunities for all young people in Finland. There is emphasis put on the process of training, rather than tests and examinations. Finnish students have a healthy balance between school life and free time, allowing them to engage more in various extra-curricular activities.

Join Future Schools special guest host, Professor Pasi Sahlberg live from Finland, talking to Finnish Principal's about various factors that have led to Finland's education system's success. This will include a discussion on education policies that have been built together with education authorities, teachers, and municipalities together with the voice of parents, researchers, and business leaders.
