

VIRTUAL SCHOOL TOUR

REAL School Budapest
Tuesday 13th September
4:00-4:45pm AEST

REAL School Budapest is an independent, not-for-profit international learning environment that educates for sustainability, primarily through real-life, entrepreneurial learning. Our mission is to raise a new generation who can dream and build a more beautiful, equitable and sustainable world for themselves and for all living beings.

Entrepreneurial attitude, social skills, understanding the relevance of subjects, actual engagement, and beautiful products are just a few of the benefits that learning through authentic projects lead to. At REAL School learning is organised around projects with clear goals and visible outcomes.

Students spend the majority of their time deeply engaged in real-life, entrepreneurial projects with a positive social or environmental impact. A focus on voice and choice are the keys to developing lifelong learning and leadership habits. At REAL School students are supported to find a balance between academic effort and performance, and how to look after well-being in equal measure.

As part of the REAL School Diploma, the school offers three core pathways: the "creative media" pathway, the "scientist" pathway and the "create your own" pathway. All pathways provide academic qualifications that open the doors to global higher education, to the world of work, or to starting your own business.
